BuddyPress

Third Party Compatibility · https://multivendorx.com/docs/knowledgebase/mvx-buddypress/

Brief Introduction

Enjoy the joy of marketplace networking as MultivendorX has now become compatible with BuddyPress. The combination of both BuddyPress and MultivendorX will let you create a marketplace community where each member is connected to one another.

Requirements

- BuddyPress

A little about BuddyPress

BuddyPress in simple words is a WordPress Plugin that helps you build any type of community website, with member profiles, activity streams, user groups, messaging, and many more.

To know more about BuddyPress read here

What does BuddyPress add to your multi-vendor site?

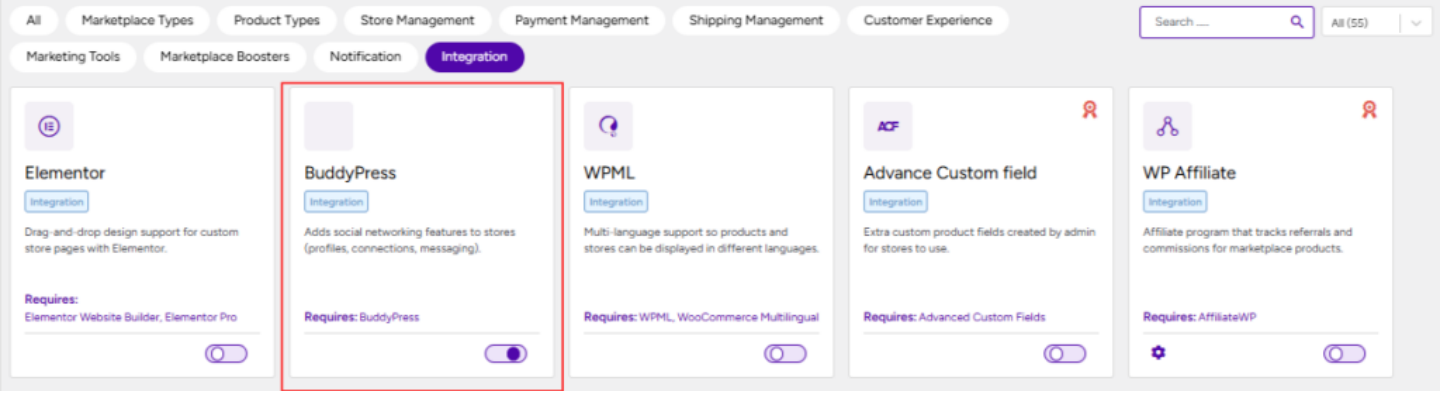
BuddyPress added to your marketplace site will allow your Store owners to sell their products on their BuddyPress social media profile.

Configuring BuddyPress from the admin dashboard

To allow store owners to sync their stores with their BuddyPress profiles and start selling, the admin needs to follow these steps:

- Locate the BuddyPress module and enable it.
- Install and activate the BuddyPress plugin.

- Navigate to **MultiVendorX → Modules → Integration** from the WordPress dashboard.



Once BuddyPress is configured in the admin dashboard, profiles will be automatically created for all store owners on the site.

BuddyPress from the Store Owner's dashboard

Once all store owners' profiles are synced with BuddyPress, they can navigate to their BuddyPress member page. Under the **Shop** section, the products from their respective stores will be listed individually.
